- Vila Nova de Gaia, Porto, Portugal

## EDUCATION

### Science and Technology

ESDJGFA - Escola Secundária Doutor

Joaquim Gomes Ferreira Alves

2018 - 2021

Grade: 17.3/20

### Informatics Engineering

ISEP - Instituto Superior de Engenharia do Porto

2021 - 2024

Grade: 15.1/20

## SKILLS

- React
- Typescript
- Javascript
- mongodb
- git
- plantuml
- Java
- Spring/Spring JPA
- JUnit
- Mockito
- Linux
- Sysadmin

## EXPERIENCE

Software Engineer Intern

2024 (Ongoing)

**msg insur:it Iberia**

msg insur:it Iberia has welcomed me since I was still in college, in the context of an internship that made part of the end of my bachelor degree. At the moment I am working as a Software Engineer full time for them, which was an exceptional opportunity to reinforce what I learned in college and by myself and being confronted with the reality of the working world. In technical aspects I deepened my knowledge on Java Spring, Backbone.js, postgresql, jenkins and openshift, helping my skills becoming more balanced.

Volunteer

2023

**World Youth Day Lisbon 2023**

This was one of the most challenging tasks I had to do in my life, since this was one of the biggest (if not the biggest) events recorded in Portugal. Here I dealt with all types of people, with different cultures than me, in stressing environments and un-optimal conditions, which lead me to learn how to deal with certain emotions in the workplace, know what it is to work in a team, improvise when things didn't go my way and being attentive to everyone to help them fulfill their needs.

Informatics Engineer

2023 (Ongoing)

**Núcleo de Estudantes de Informática ISEP - NEI**

In here I worked in the IT department, prone to learning what projects in a work context are (since I only had curricular projects at ISEP) and also learn new technologies that I didn't use in my college experience, such as Tailwind CSS. I also sharpened some technologies that I already knew, such as React.js and Typescript. One project that I participated was the website developed for the event Fallstack 23/24. Since I finished my degree in 2024, I am now considered an alumni, but somewhat active within the community, always grateful for the opportunities that were given to me by them.

Basketball Athlete

2008 - 2020

**Federação Portuguesa de Basquetebol - FPB**

Basketball was one of my passions for a long time, I played professionally at FPB in some teams for approximately 12 years, but had to quit due to health problems (that are now solved, but I'm not able to play professionally anymore). While I did play, I learned strategy, critical thinking and to perform under pressure, since we had to find ways to trick our opponent.
